Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 February 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Claim Objections

1. Claim 1 is objected to because of the following informalities: line 3 “seam tape said portion” is confusing. Should it be “seam tape, said portion”?

Appropriate correction is required.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Leeuwenburgh (5935669).

Leeuwenburgh shows a method of rolling a membrane sheeting having a seam tape (16) applied only along a first edge of the membrane sheeting with a portion of the membrane sheeting having no seam tap, the portion (14) extending from the seam tape to a second edge comprising folding the portion of the membrane sheeting over upon itself to form a folded sheet wherein the portion of sheeting does not overlies any area of the membrane sheeting having seam tape adhered thereto (figures 1, 3), the seam tape is on a first surface of the membrane sheeting and the portion of the membrane sheeting is folded onto the first surface (col 2-3, lines 65-2 discloses the different possible location of the fold and the tape), rolling the membrane sheeting (col 2 lines 30-34), the seam tape is on a first surface of the membrane sheeting and the portion of the membrane sheeting is folded onto a second surface of the membrane sheeting, the sheeting

having a first edge and a second edge, the portion of the membrane is folded toward the first edge with the second edge of the sheeting resting adjacent the seam tap (figure 3).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Leeuwenburgh (5935669) in view of Cox et al (5654055).

Leeuwenburgh shows all the claimed limitation except for the membrane sheeting being EPDM.

Cox et al discloses backing sheeting being made of a variety of plastics including EPDM (col 6 lines 47-62).

It would have been obvious to one having ordinary skill in the art at the time of the invention to modify Leeuwenburgh's structure to show the membrane sheeting being EPDM because it would provide a balance between compliance and clean removal as taught by Cox et al.

Response to Arguments

5. Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 3637

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art shows different folding configurations for tapes.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed; and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phi D A whose telephone number is 571-272-6864. The examiner can normally be reached on Monday-Thursday.
